

We'd like to have the drawing in .dxf format (standard, automatic)

Numbers in different format and with different precision (digits after the point).

Are they generate automatically by a CAD tool or placed manually? ⇒ drawing in .dxf format (standard, automatic)

TOP VIEW of the SLB-PMC

It is missing the vertical location of the 14-pin connector (in the sample PCB that we have it is not aligned to the bottom-edge)

This is not referenced to the edge of the board

This 3 numbers don't add up to the total (1490 mil)
